

A teacher with a beard and glasses, wearing a grey polo shirt, stands at the front of a modern classroom. He is gesturing with his right hand towards a large projection screen. The screen displays a presentation titled "Peta Batam" with a circular diagram in the center and a bar chart on the right. The classroom has large windows on the left, letting in natural light. Several students are seated at desks, facing the teacher. They are using laptops and tablets, some displaying data visualizations. The room is decorated with potted plants and shelves with books and decorative items.

Shiksha: Learn by Teaching AI

A Personal Cognitive Coach for the cost of a single meal — building the Data-Driven Classroom of 2026.

AI displacing, Not supplementing learning

MIT research: LLM usage causes cognitive debt — students outsource thinking rather than developing it.

The Solution: Feynman Method Meets Dual-Agent AI

Student Teaches

Earns Mastery Credits by explaining concepts to Learner AI

AI Questions

Probes with follow-up questions to test real understanding

Deep Analytics

Wisdom AI measures and tracks Mastery Credit progress

₹1,750/year = a Personal Cognitive Coach. 🗝️ **Cheating-Proof:** logic must be demonstrated, not copy-pasted.

Dual-Agent Architecture

Two specialized agents — smarter than any single general-purpose AI.

Student AI

Zero Knowledge state — structurally prevents students from extracting answers. A Structural Defense against Prompt Injection. Specialized to be curious.

Knowledge AI

Delivers lesson plans, deep analytics, and Mastery Credit progress insights for teachers.

 Present Demo to show

MISSION

Putting Humans at the Center of AI-Based Learning

AI that supplements human thinking – making students smarter, not dependent.

Customized AI

Open source models tailored for education

Agentic Framework

Intelligent systems that adapt to learners

ANALYTICS

Deep Analytics That Teachers Actually Use

Dimension

Shiksha-TA: your Classroom Diagnostic Heatmap — empowers teachers with data; does not replace teacher assessment.

92%

Explanation Quality

82%

Class Average

SHIKSHA-TA

Teacher Dashboard.

Red Flag Alerts

Targeted Intervention: identifies
Concept Gaps before exams, not after.

**Classroom Diagnostic
Heatmap**

Precision Pedagogy: teachers spend
less time guessing, more time teaching.

Lesson Plan Engine

AI-generated suggestions based on
class-wide Feynman gaps.

Empowers teachers with data; does not replace teacher assessment.

The Shiksha Market Opportunity

PRICING MODEL

Simple, Transparent Pricing

Annual Institutional Fee (B2B)

₹99,000/year

Includes setup, admin dashboard, lesson plans, and assessments.

Student Subscription (B2C)

₹1,750/year per student

Mastery Credits Plan — 1 interaction = 1 Mastery Credit attempt.
Top-ups available on-demand.

 Low Friction Entry: Platform pays for itself with less than 20% student adoption. Zero API liability for schools.

PARTNERSHIP

Why Schools Partner With Us

Financial

₹99,000/year flat institutional fee. Student subscriptions at ₹1,750/year are paid directly — no hidden costs or revenue sharing.

Pedagogical

Mastery Credits + Feynman Method. 80%+ prefer it. Measurably deeper retention.

Administrative

Classroom Diagnostic Heatmap. Concept Gaps identified before exams. 5+ hrs saved/week.
